Tre' Galloway

Systems Developer & Electrical Engineering Student

New Orleans, LA tre@tregalloway.com https://tregalloway.com https://www.youtube.com/@tregalloway

SUMMARY

Transitioning from a self-taught software background into formal Electrical Engineering. Focused on bridging low-level systems programming (Rust, C) with hardware interfaces and edge AI. Passionate about building functional tools from the bare metal up.

EDUCATION

Delgado to LSU New Orleans Electrical Engineering

Computer Engineering Jan 2027 – Present

FEATURED PROJECTS

Fleet (In Development) | Rust, Linux Systems, Tokio, SSH

- Architecting an open-source, low-level server management CLI tool.
- Designed for memory-safe, high-performance monitoring and process orchestration on edge nodes and homelab servers without heavy runtime overhead.

Advanced Homelab Infrastructure | Linux, Docker, Tailscale, Networking

- Designed, deployed, and currently maintain a self-hosted edge network using an AMD Ryzen/RTX architecture.
- Managed through Docker and Portainer, utilizing Cloudflare Tunnels and a Tailscale mesh network for secure, remote systems access and self-hosted application routing.

CERTIFICATIONS

Network +

Comptia

AWS Cloud Practitioner

AWS

EXPERIENCE

Amazon Delivery Service Partner New Orleans, LA

Delivery Driver

Freelance Web Developer Mar 2022 – Present

- Create websites to help customers with their business needs

Current

- Manage high-volume logistics and route execution in a fast-paced environment.
- Note: Maintaining full-time employment to fund independent hardware projects, server infrastructure, and upcoming formal engineering education.
